ANNOUNCEMENT TO MEMBERS

In June this year, after lengthy negotiations, the Club signed a Memorandum of Understanding with a number of parties, including SA Water and the City of Charles Sturt, whereby we would work together to ensure that a wetlands and ASR project linked to Council's Port Road stormwater harvesting project would incorporate the Riverside Golf Club.

Yesterday an announcement was made by the State and Federal Government's that funding for a number of projects had been approved, including that planned for Riverside. The proposal will see a wetlands, similar to that at Grange Golf Club, established on our practice fairway and will ensure future water supply and, over time, improve the quality of our bore water.

The MoU states that SA Water will, subject to Cabinet approval, provide land to the golf club to allow relocation of existing facilities to enable the scheme to proceed. We will continue to work with SA Water to develop plans for the use of a portion of their surplus land however it goes without saying that we will not relinquish any of our existing property unless what is finally offered fulfils our requirements and development is financially viable.

Members can rest assured that the changes to the course resulting from the acquisition of additional land will include much needed improvement to the practice facilities.

Alan Fielder
President
